Hi Aaron

As we discussed, i would like to read all the correspondence that has taken place regarding the audit, license renewals from 2014, and any resulting topics from these issues. I trust copies of all emails both under gva address and officers and/or involved member's personal email addresses have been printed and filed in the gva files. Notes from phone conversations should also be included please. This is very important documentation and should be available for all gva members and kept incase anything results in the future.

I really think the faster this is resolved and put to rest, the better for gva and all involved. Lets get this over with and move on in a positive effort.

To that end, please let me know where these documents can be found so i can read them. I am not expecting you to make copies for me, i will come to ambulance office and read them. If you prefer to meet me there and do this together, thats fine. I would like to do this today, friday, or saturday, whichever is better for you, or to be proper, actually Captain April.

Also, please send all members the notice of when April will be available in person for a meeting to discuss this as we agreed in Monday's meeting.

Thanks. Dotti
